

# ONLINE SCIENCE EDUCATOR CERTIFICATION COURSE

The Online Science Educator (OSE) Certification Course prepares instructors to teach online science courses with innovative, inquiry-based pedagogies.

Our next class date will be scheduled soon. Stay tuned!

An **8-week asynchronous online course** designed to accommodate the schedules of busy professionals. The course has defined start dates and end dates, but there is no appointed time or day to be online. Participants determine the schedule that's right for them.

The demonstrations of competency and assignments in this course include modules and tasks designed for practical application during an online science education career. The evaluative components include web-publishing of resources created and curated during the course.

## Course Objectives:

- ▶ **Develop** appropriate strategies for maximum student engagement.
- ▶ **Design** an action plan for compliance with intellectual property and student privacy protections including copyright law, Fair Use, ADA, and FERPA.
- ▶ **Apply** principles of basic online course design and instructional pedagogy.
- ▶ **Develop** creative and alternative assignment and assessment strategies that promote learning and student engagement.
- ▶ **Create** a cloud-based portfolio of the learning that occurred during the course.
